

Welcome to the cosmic portal of the Museum of Tomorrow.

Are you ready?

Great!

Now, just wait for our time machine to take us to the beginning of the cosmos and enjoy the journey.

Thank you and enjoy the film!

We are the void.

We are time and space.

We are light.

We are energy.

We are matter.

We are atoms.

We are the Universe.

The Universe is constantly unfolding.

Unfolding into matter.

And matter unfolding into life.

Life that is mutation and evolution.

Life that unfolds into instinct.

Life that unfolds into thought.

Thought that imagines the Universe.

We are Life.

We are rhythm and movement.

Diversity.

Words and silence.

We are memories.

Knowledge and invention.

We are Earth.

We are the unfolding Universe.

Unfolding into matter.

Matter into life.

Life into thought.

We are the thought that envisions Tomorrow.

Tomorrow that is here.

And now.
